

## **Science Diplomacy in the 21st Century. Foundations, actors and dynamics for future practice.**

Erice (Trapani) 2-8 October 2024

First workshop of the International School Science & Diplomacy opened this year at the Ettore Majorana Foundation, Foundation and Center for Science and Culture, created by Antonino Zichichi in 1963 for dialogue between scientists behind the Iron Curtain. On the occasion of the anniversary of the foundation of the Center, in November 2023, in the conference of the Directors of all the international schools, this latest school was opened, a novelty at a national and international level because, starting from international history, and involving witnesses of the recent past and actors of the present time, investigates the dynamics of techno-scientific diplomacy with a strong interaction with students engaged in experimenting with a storytelling laboratory on the historical case of Halley's Comet Armada and a wargame dedicated to the Mediterranean. The University of Padua will publish a call for some scholarships.

Directors: David Burigana (University of Padua) Virginia Coda Nunziante (Head of International Relations of the CNR) Pascal Griset (Université Paris Sorbonne) Giacinto Ottavia (President of the Center for Advanced Defense Studies) Umberto Vattani (President of the Venice International University)

## **Science Diplomacy in the 21st Century. Foundations, actors and dynamics for future practice**

**reimbursement of room and board expenses for young experts**

**University of Paris-Sorbonne**

**University of Padova**

**Deadline 2nd August**

**Announcement of selected experts 9<sup>th</sup> August on the website [sciencediplomacy.it](http://sciencediplomacy.it)**

Erice (Trapani) 2-8 October 2024

The University of Paris-Sorbonne and the University of Padua finance a total of 6 to 8 young experts on Science Diplomacy to attend the first workshop of the International School Science & Diplomacy opened this year at the Ettore Majorana Foundation, Foundation and Center for Science and Culture, created by Antonino Zichichi in 1963 for dialogue between scientists behind the Iron Curtain.

Participants in the school will have to show strong interaction with the invited lecturers, both in the storytelling workshop and in the wargame. What we ask of those who wish to be funded by the Universities of Paris-Sorbonne and Padua is to present a Science Diplomacy case study proposal. Particular attention will be given to those who, while proposing a topical topic, demonstrate that they take into account the evolution of the proposed topic in relation to the international context in the medium and long term. An operational history approach is therefore interesting, but not

exclusive. The objective of the scholarships is to allow candidates to set up a scientific article or a report to be proposed to a scientific journal or for an open access publication.

Candidates must attach to the application for participation in the School of Erice a case study proposal of approximately 500 words, also suggesting some bibliographic or archival sources if appropriate.

The selection commission is the same as the participants in the School. Selected candidates will be notified via email on 9th August.

Directors: David Burigana (University of Padua) Virginia Coda Nunziante (Head of International Relations of the CNR) Pascal Griset (Université Paris Sorbonne) Giacinto Ottavia (President of the Center for Advanced Defense Studies) Umberto Vattani (President of the Venice International University)
