

Since **2013** the Department of Political Science, Law and International Studies of the University of Padova has hosted **Next Generation Global Studies (NGGS)** Winter Schools 'Spaces and Times of Globalization' to critically address the **challenges of time and space in global transformations**. Supported by a funding scheme of the University of Padova, these intensive courses have involved **critical reflection on the Eurocentric representation of global space and time**; an open and **transdisciplinary** approach to the debated issues; and a variety of formats through which presenters, participants and invited guests have engaged in 'glocal conversations'. NGGS has thereby built a scholarly community, interested in exploring the heuristic potential of mixing perspectives, languages and knowledges.

The 2025 winter school addresses the key theme of **coloniality**, which has become a fundamental issue as Western institutions are increasingly called upon to reckon with their colonial histories and entanglements. Colonization, as the contact between a European subject and 'native' others, organized races, languages, knowledges, cultures etc in a hierarchy separating those that had value and those that did not have value. This hierarchy became hegemonic and is understood as coloniality. Language, translation, interculturality, the arts and the digital are often used to reinforce and reproduce coloniality - of power, of knowledge, of language, of being - but they are also used to defy coloniality and hegemonic forms of **globalization**. This Winter School will offer participants a critical framework for identifying, interrogating and interrupting coloniality, its legacies and to unlearn in order to **re-think** by expanding south-south solidarities, with art and intercultural translation as sites for solidarity and resistance against colonial legacies and epistemic injustice, racisms, political and climate crises.
